You can help

You can help support the next generation of St Andrew’s students by:

– Completing the gift form on the back of your letter and returning it with your cheque or credit card details in the reply paid envelope

– Telephoning the Advancement Office on 61 2 9565 7302 or 8594 8248 to make a credit card donation

– Online at standrewscollege.edu.au/support-st-andrews/annual-giving/
  • You can make a single donation, or
  • You can make a recurring monthly payment. (please note if you choose this option your gift will be direct debited from your bank account on the 15th of each month)

From the Bird

I would like to start by saying thank you to all our donors for your support for our students via Annual Giving over the last two years; to date we have raised over $160,000. Thanks to your generosity, in 2014 we built a much-needed bike shed and in 2015 refurbished a room in Main Building and made a valuable contribution towards the JCR Renovations. Partnering with Council, in 2015 you were able to create three new rural and one new government school scholarship.

This year in Annual Giving we are honouring second-generation Andrewsman Associate Professor Geoffrey White AM (Fr 1970). Geoffrey White was a world-renowned pioneer in the field of endovascular surgery developing many new non-invasive treatments that vastly improved the recovery time of patients. Geoffrey passed away in 2012, aged 60, and the College is seeking to raise funds to honour his legacy with the creation the College’s first medical scholarship.

With the Lounge renovation complete, the Students’ Club is planning the next phase of the JCR renovation. The Senior Student, Xander Jackman, once again invites you to support the Students' Club as it continues to renovate the social hub of College.

With your gift to Annual Giving, you have the opportunity to shape the St Andrew’s experience for all our students. I look forward to continuing our partnership on our journey towards creating a world-class university college.

Wayne Erickson
Principal
Scholarships and Bursaries

This year 56% of our Rural and Regional students require financial support to come to St Andrew’s highlighting the importance scholarships play in giving them the opportunity to live at College. Your support for these students allows the College to keep its long-standing commitment to students from rural, regional and remote areas and ensures that students from a wide variety of backgrounds have the chance to become part of and contribute to the St Andrew’s community.

St Andrew’s commitment to diversity is challenged by the significant cost of tertiary education. In 2016 a quarter of our current residents applied for bursary assistance. With your help, we can provide financial assistance to the many outstanding students who may not otherwise have the financial means to come to College.

The Senior Student’s Fund

Last year, Gemma Larkin wrote to you all in an appeal for donations for works to be completed on the JCR. With your support, the House Committee of 2016 has been able to start to transform the lounge area of the JCR. So far, the carpet has been pulled up and replaced by a polished concrete surface and two new coats of paint have been applied by the students. In the near future, we look forward to the installation of a new TV and sound system, as well as the arrival of new couches and rugs. To be in charge of such significant works has been a tremendous experience, and we hope that the future developments will build upon the legacy. We call for your support to finish the job in a way that is characteristic of the Androvian experience, where life and love is found as freely as ever.

Xander Jackman
Senior Student

Geoff White

Associate Professor Geoffrey White AM (Fr 1970) was a world-renowned pioneer in the field of endovascular surgery. A second-generation Andrewsman, Geoffrey was a leader in the development of vascular treatments that replaced intrusive open heart surgery with less invasive procedures, vastly improving the survival rates of patients. Geoffrey passed away on Australia day in 2012, however his legacy continues through the lives of the patients who, daily, benefit from his pioneering techniques and are often able to return home the day after surgery. Widely respected by his peers, in Australia and overseas, his contribution to the medical and wider community is an inspiration for medical students and young surgeons alike.

The College will honour this highly-respected Andrewsman by creating St Andrew’s first medical scholarship.

“For many students from Rural and Regional Australia, the opportunity to attend a world-class residential College is simply out of reach.”
