Post Graduate Research Scholarships 2023

St Andrew's College wishes to encourage more research post graduates to reside at St Andrew's College. Up to 4 scholarships will be available in 2023 for students undertaking research masters, PhD or post doctoral research studies.

Scholarships will normally be in remission of up to \$7,000 of College fees for 1 year and can be extended after successful completion and reapplication each year. Prospective applicants will have taken a keen interest in being part of an academic community, and will be interested in engaging in regular collegiate social and academic gatherings and in taking an active part in College life. Scholarship recipients will be expected to undertake ongoing academic mentoring for a small number of undergraduate students as a condition of their scholarship. In addition, there may be opportunity to undertake casual paid tutoring through the St Andrew's College Tutorial Program.

Prospective applicants must apply in writing detailing how they would contribute to the life of College, attach a recent copy of their CV, academic transcript and complete the St Andrew's College admission application available on the College website.

Closing date Friday 31 January 2023.

As the process is highly competitive, early application is advised. All new students must complete both a St Andrew's College application for College admission and an application for the Post Graduate Research Scholarship concurrently.
